Flower Carpet Red – Plant of Merit!

The Trial Gardens at University of Georgia includes Flower Carpet® Red as a “Plant of Merit”.

The Trial Gardens at UGA (located in Athens, Georgia) trials the newest varieties of annuals from all over the world and puts perennials to the test to find those that stand up to southeastern heat and humidity.

This week, Flower Carpet Red is included as one of the “spectacular plants of merit”, having performed exceptionally well in the UGA trials.

Flower Carpet® Red loves hot warm conditions and just blooms and blooms and blooms...from mid spring to late fall. It produces velvety deep-red flowers accented by brilliant golden yellow stamens all over the bush and has deep glossy green foliage with a burgundy edge.

Flower Carpet Red is known for its disease-resistance to common rose blights such as black spot and mildew and is ideal in the landscape for mass plantings.

So tell your customers about this latest recognition for the multi award winning series of easy-care Flower Carpet Roses, and now is the time for them to have them in-store.

Best regards,

Anthony TesselaaR Plants
